

**A) Operating System – Windows XP SP3 and above, Windows Vista, 7, 8, 8.1, 10**

**\*Note: Make sure all your browsers are closed before running this file.**

1. Download the Zip File “DSC SETUP” From “<https://srm.bel.co.in/>” and Extract it to some local drive on your machine.
2. Open the extracted Folder on your machine. It should look something like this.

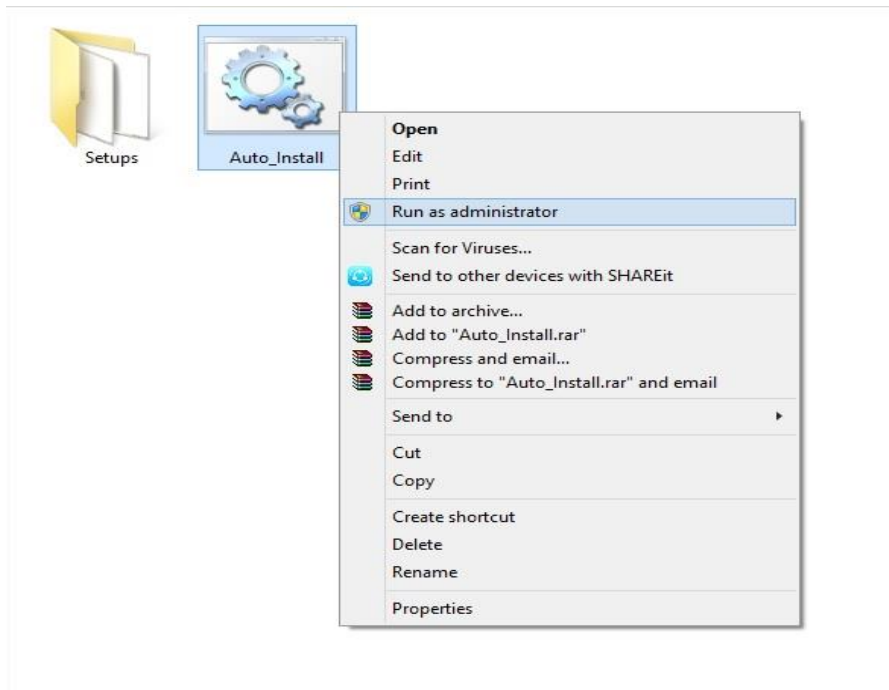

Open the “**Manuals**” Folder and Follow the manuals in sequential manner”

3. Steps to follow for **Installing Java and Microsoft Libraries.**
4. Open the “Executables” Folder. It should look something like this.

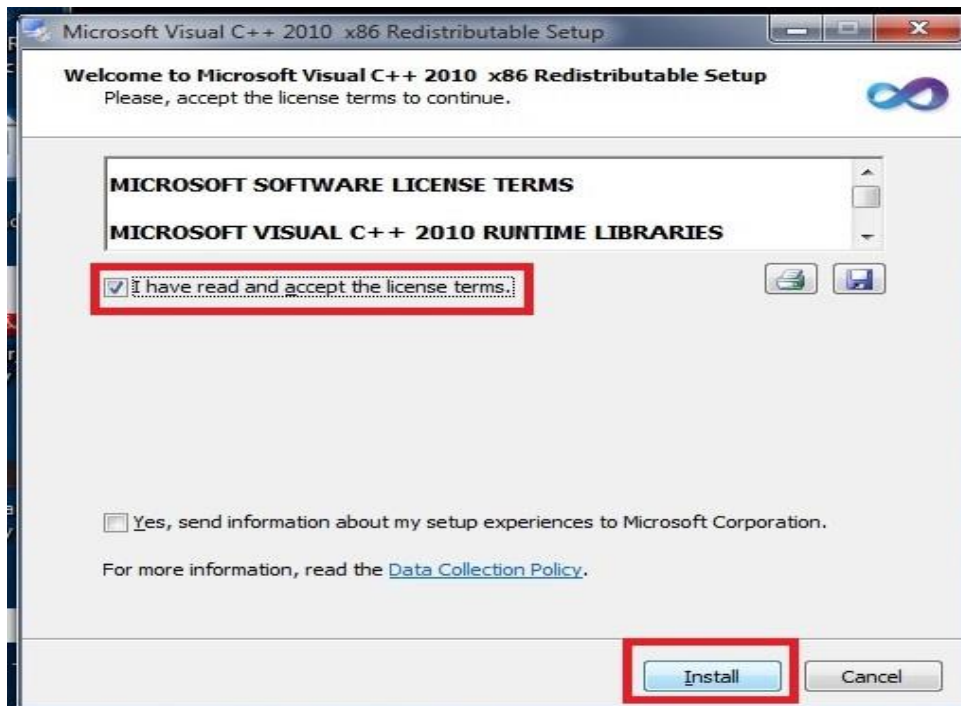

5. Right Click on file "Auto\_Install" -> Select "Run as Administrator" -> Click OK.

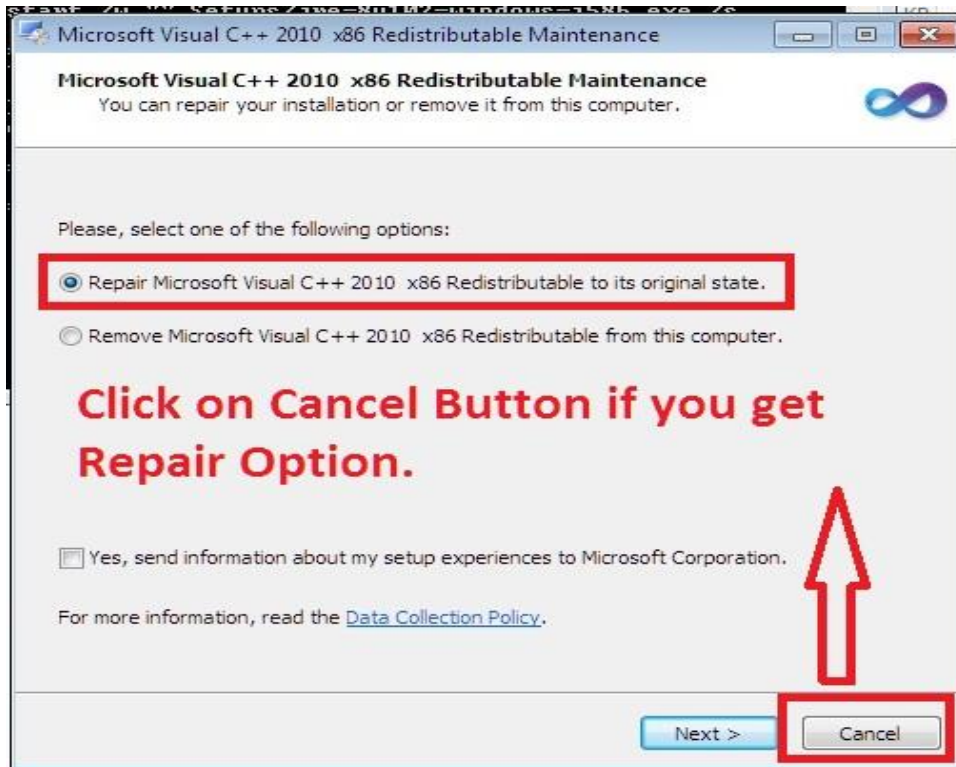

6. Wait for the console to install Java first. Then the screen will ask you to install Microsoft Libraries in a few minutes. Select **NEXT** and **INSTALL** as per the steps given below. (\*Note: Do not close the console window while it is running. It will get closed automatically )

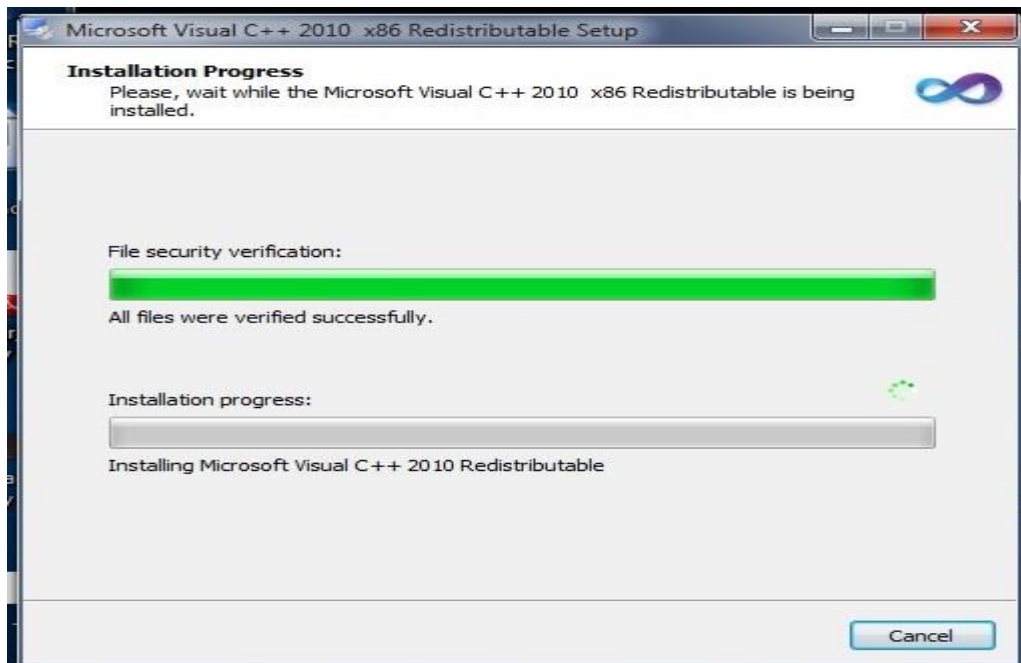

7. Select License Agreement and Click on Install.

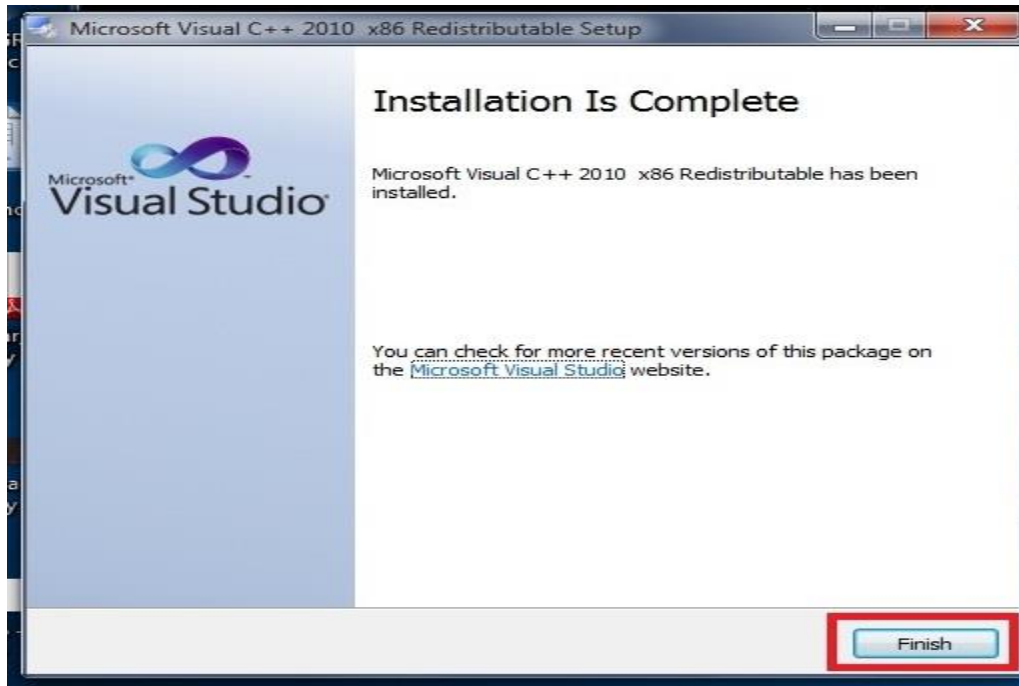

\*Note if you get a Repair Screen Instead of the above shown screen that means **Library is already installed on your Machine** so cancel the setup otherwise continue with point 9.

9. Let the Setup Run

10. Click on Finish

Wait for the Console screen to close.
